Projects

Insight-Aircraft Transaction Tracker

Aug 2025 - Feb 2026

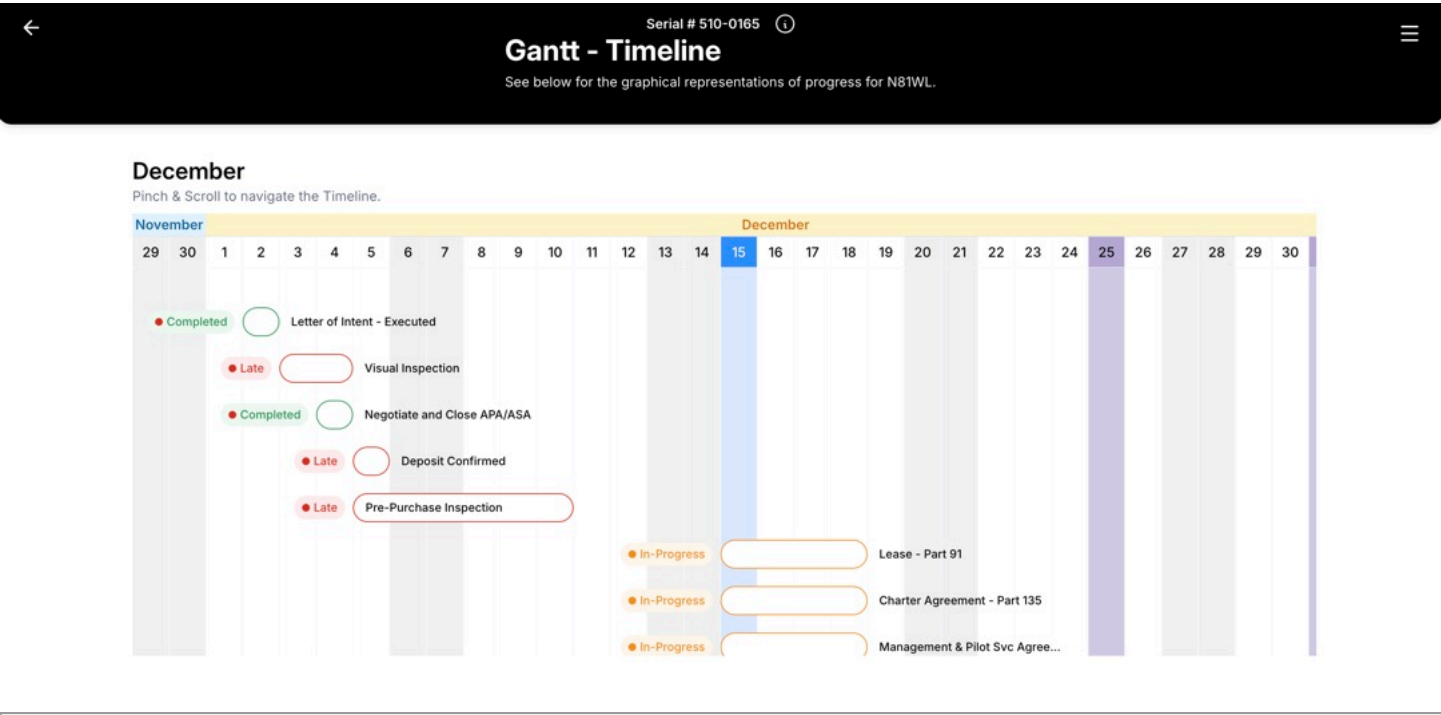

Description:

The Insight-Aircraft Transactions Tracker is a tool designed to monitor and record aircraft sales and transactions, with a focus on tracking timelines and key milestones.

Responsibilities:

- Led the project by gathering requirements, breaking down tasks, delegating work, testing, and deploying.
- Developed a backend system that serves APIs for the frontend.
- Designed and implemented DevOps architecture and CI/CD pipelines.

Technologies: [Next.js v15.4.5](#), [shadcn-ui](#), [next-auth](#), [prisma](#), [CASL](#), [tailwindcss](#)

B-Accounting Internal system

Mar 2025 - Feb 2026

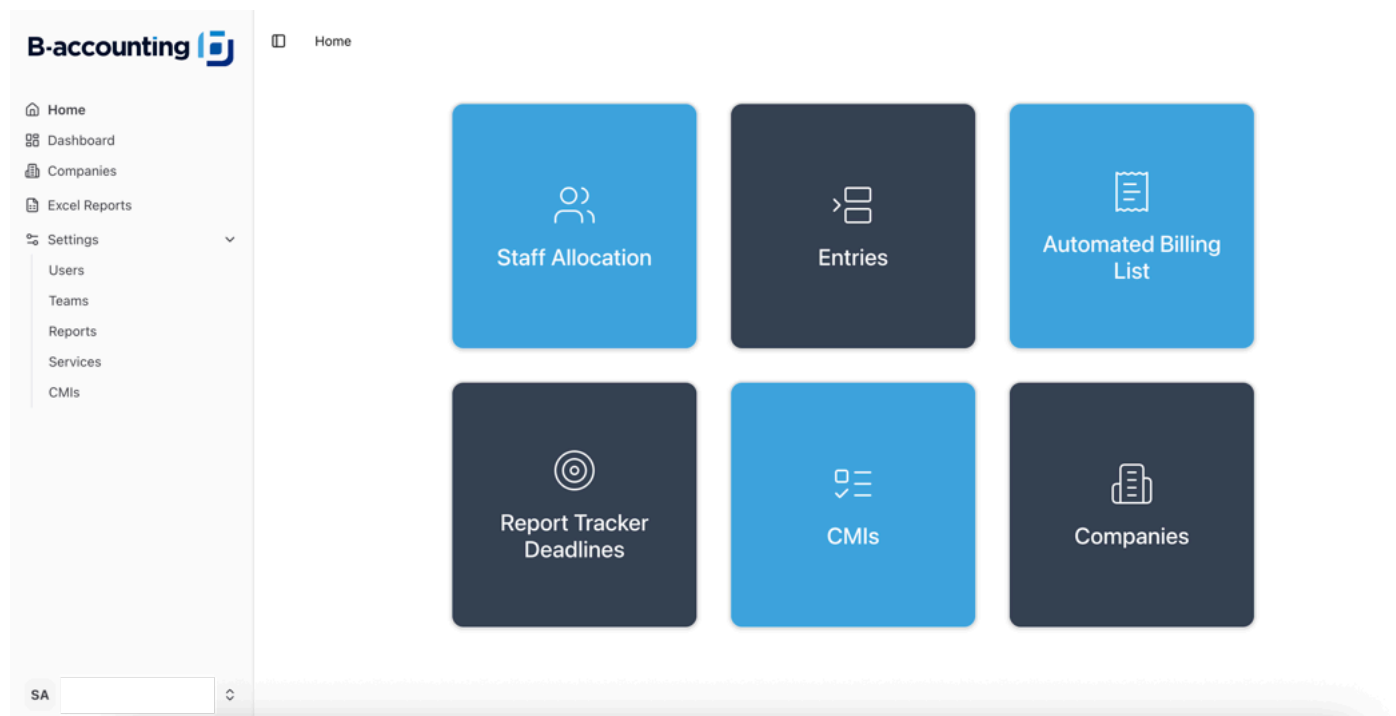

Description:

A system for overseeing company assets, tracking employee resources, managing client services, reports, and meetings.

Responsibilities:

- Developed an Excel data export summary with a design that meets the requirements.
- Developed a company drive for managing files in storage.
- Assist with front-end minor changes.

Technologies: [Next.js v15.5.9](#), [shadcn-ui](#), [next-auth](#), [prisma](#), [CASL](#), [tailwindcss](#), [Exceljs](#)

CompMoto POS

Jan 2025 - Jul 2025

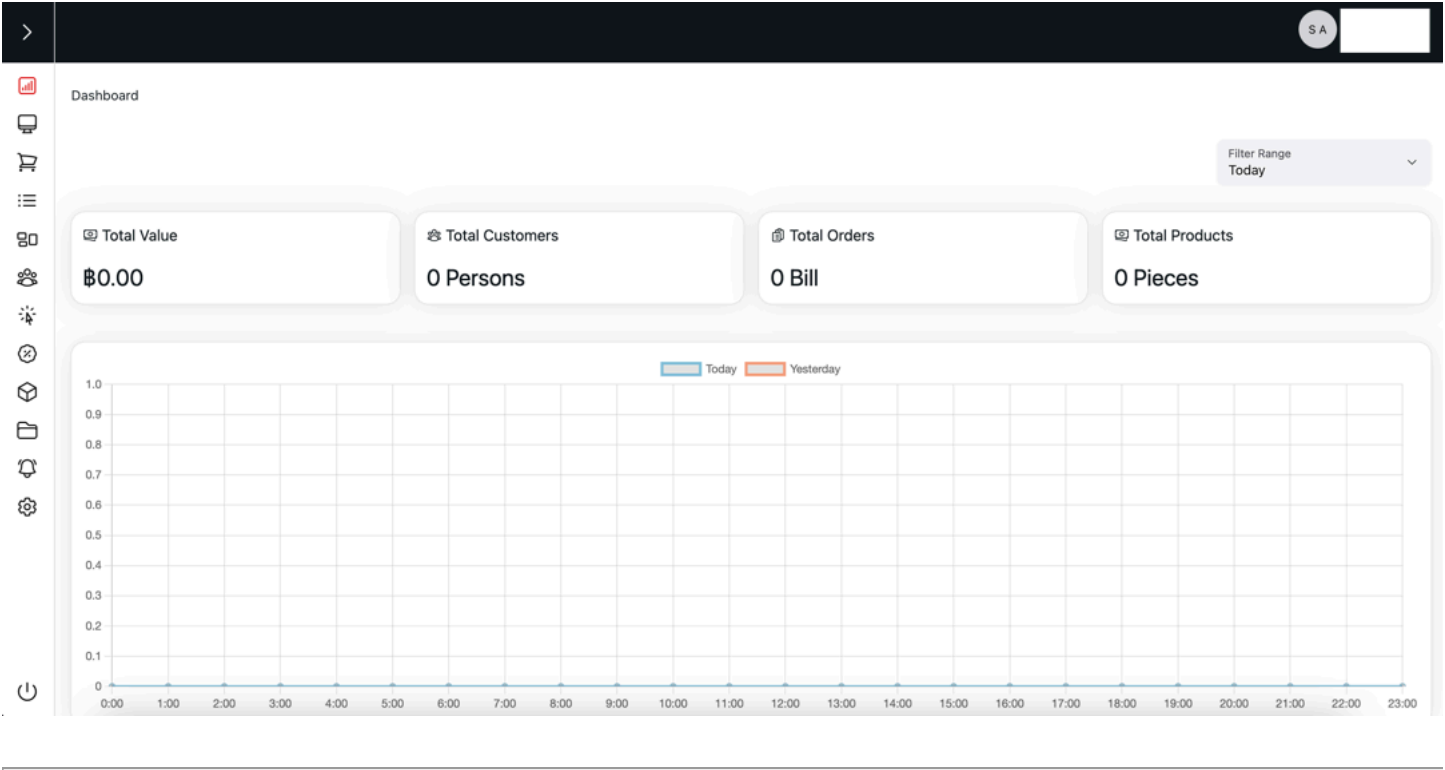

Description:

POS Stock Management with Microsoft Dynamics (Cloud ERP) Synchronization for Automotive Parts, Products, and Services.

Responsibilities:

- Developed APIs for dashboard, cashier, and emailing systems.
- Built parts of CMS frontends and assisted the team in validating business logic.

Technologies: [Next.js v15.0.2](#), [nextui](#), [next-auth](#), [prisma](#), [CASL](#), [tailwindcss](#)

Easyhealth

Jun 2024 - Feb 2026

Description:

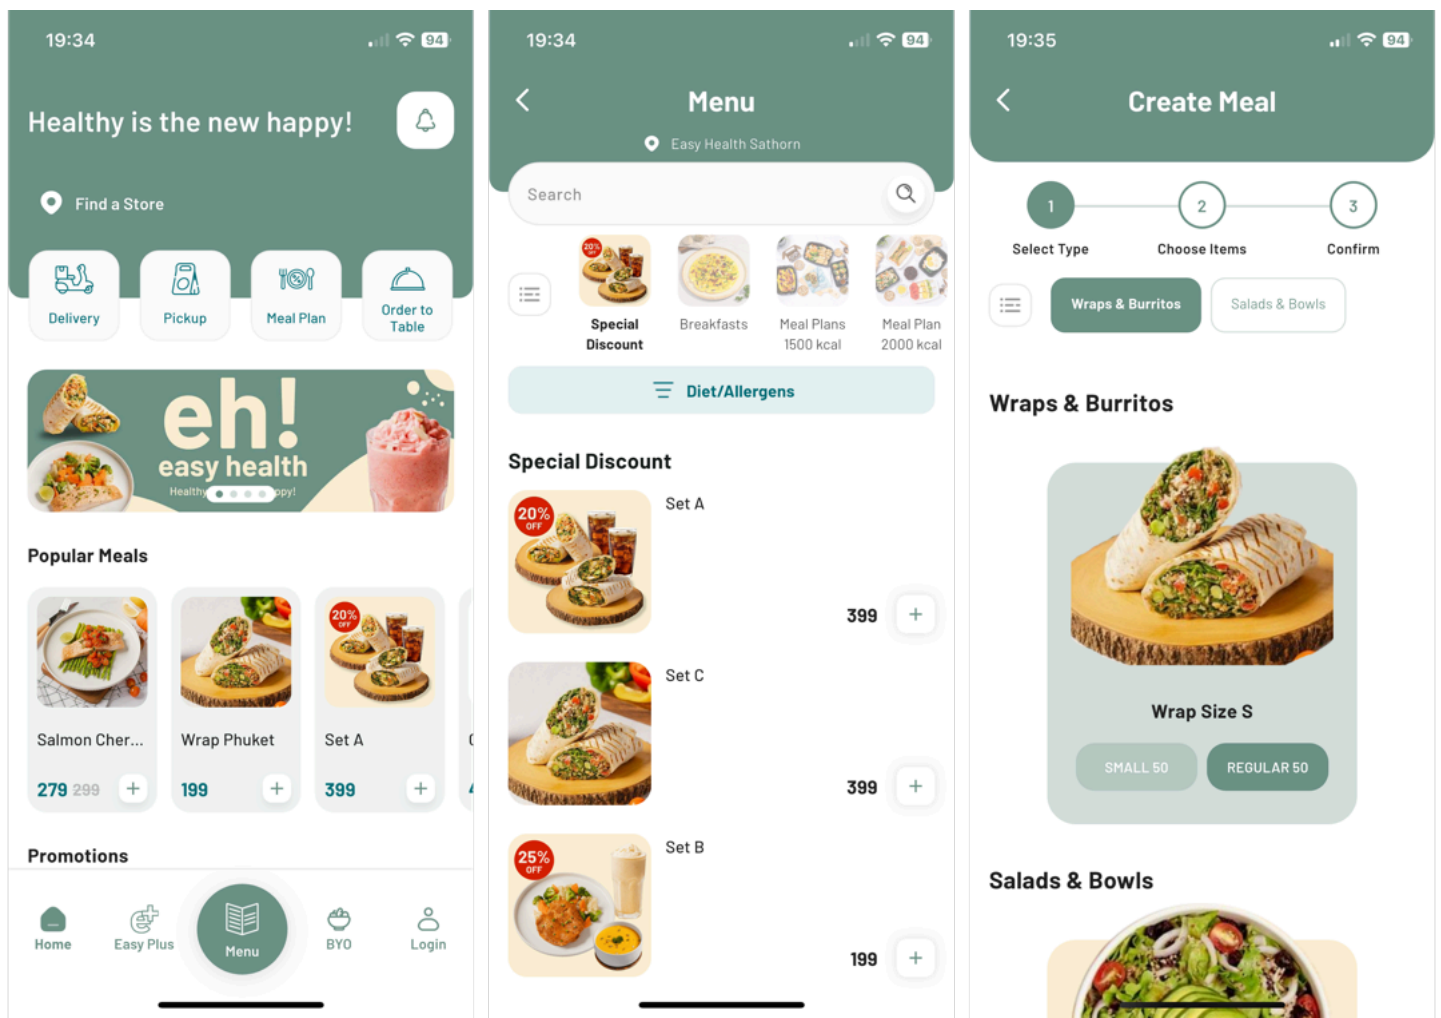

An e-commerce platform for healthy food products, featuring web and mobile apps with customizable meal bowls and detailed micronutrient information.

Responsibilities:

- Integrate Kosmo Delivery for rider location tracking.
- Implement app notification API.
- Collaborate with mobile app team on Stripe (now Omise) payment gateway integration.

Technologies: [Next.js v15.1.6](#), [heroui](#), [next-auth](#), [prisma](#), [tailwindcss](#), [Stripe](#), [Kosmo Delivery](#)

Link: [Website](#), [App Store](#), [Play Store](#)

Mewing App

May 2024 - Feb 2026

Description:

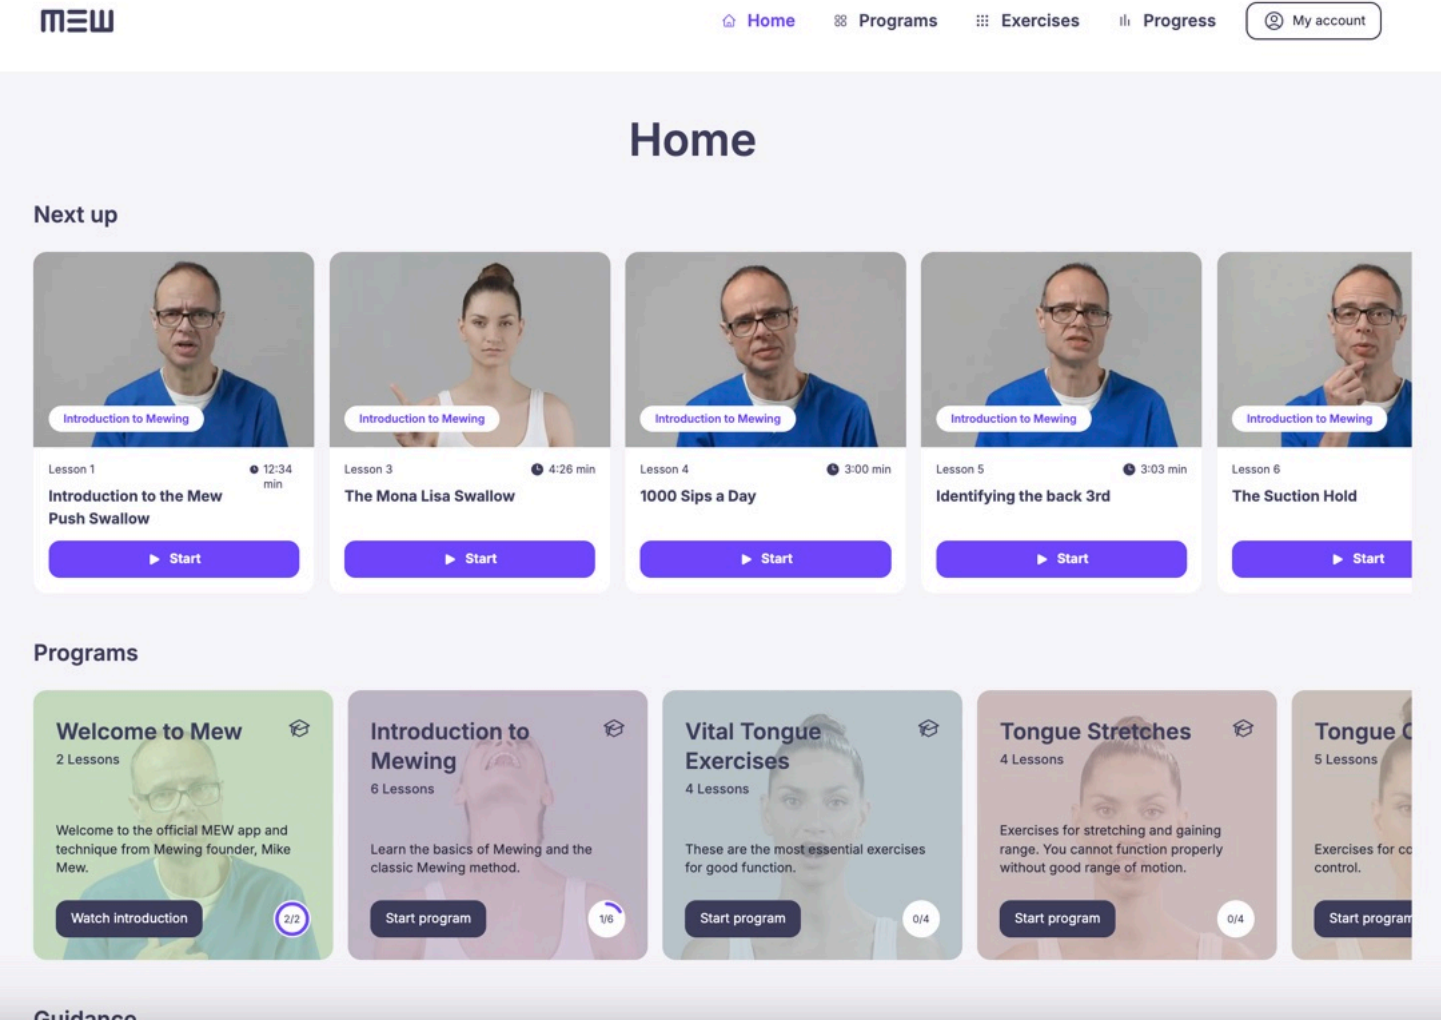

Subscription-Based Video Service for Mewing Content on Mobile App and Website.

Responsibilities:

- Developed data synchronization with the Klaviyo marketing platform.
- Implemented a payment gateway integration using Stripe.
- Built APIs for mobile app and web front-end.
- Contributed to the development of the web front-end.

Technologies: [Next.js v15.0.2](#), [nextui](#), [next-auth](#), [prisma](#), [tailwindcss](#), [Klaviyo](#), [Stripe](#)

Link: [Website](#), [App Store](#), [Play Store](#)

El Mercado

Jun 2023 - Dec 2025

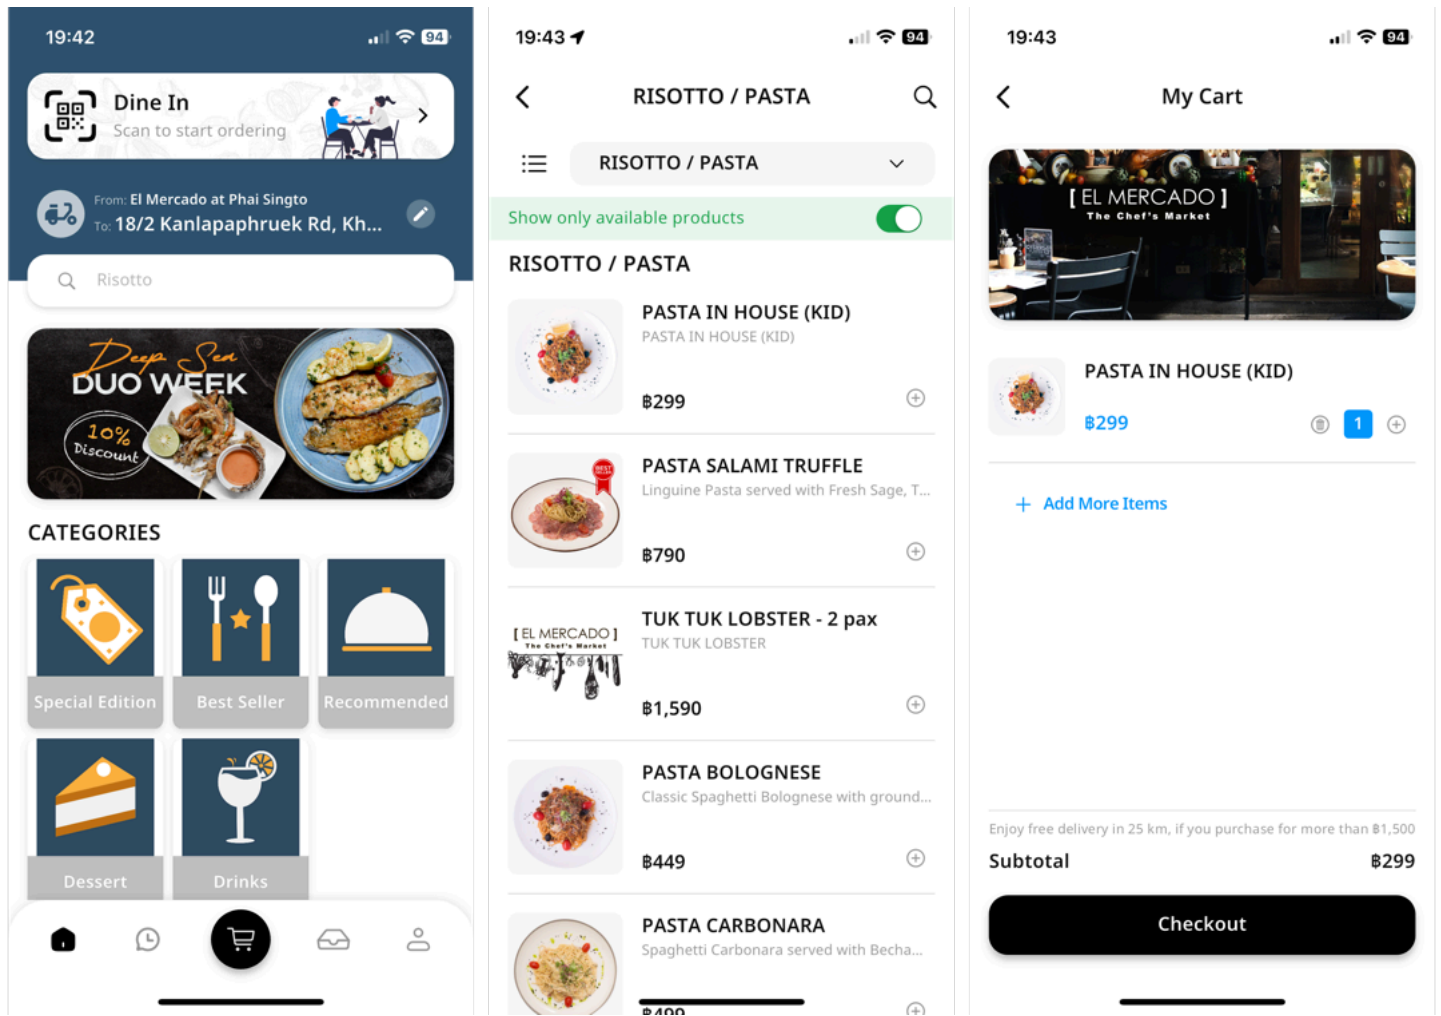

Description:

An e-commerce platform for a Mediterranean restaurant, featuring mobile apps with delivery and dine-in options, including customizable choices, side dishes, and more, integrated with Oracle NetSuite (Cloud ERP) for synchronization.

Responsibilities:

- Developed multiple APIs to support mobile and web front-end features and functionality.
- Implemented and managed the full payment gateway integration process.
- Managed CI/CD pipelines to ensure efficient and reliable deployment workflows.
- Collaborated closely with the mobile app development team to align on project goals and deliverables.

Technologies: [Next.js v13.5.6](#), [headlessui](#), [next-auth](#), [prisma](#), [tailwindcss](#), [Stripe](#)

Link2Team

Mar 2023 - Oct 2024

Description:

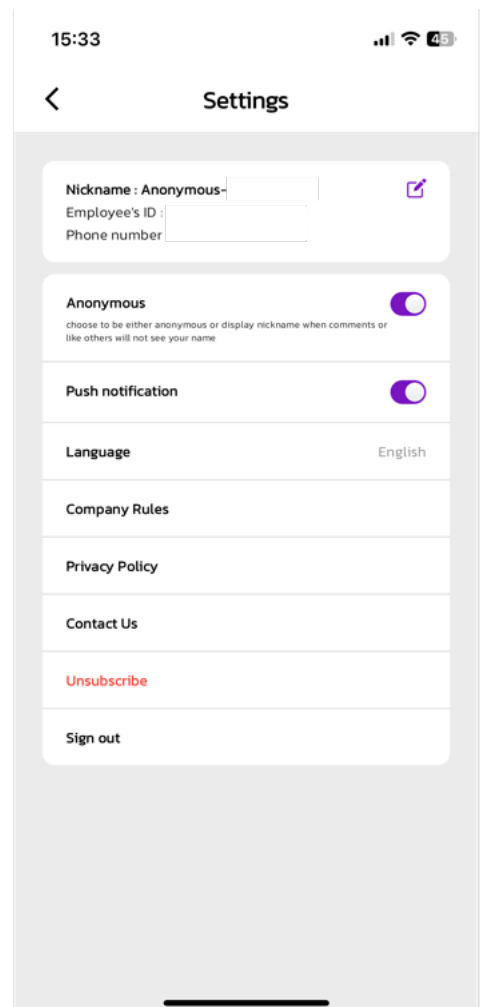

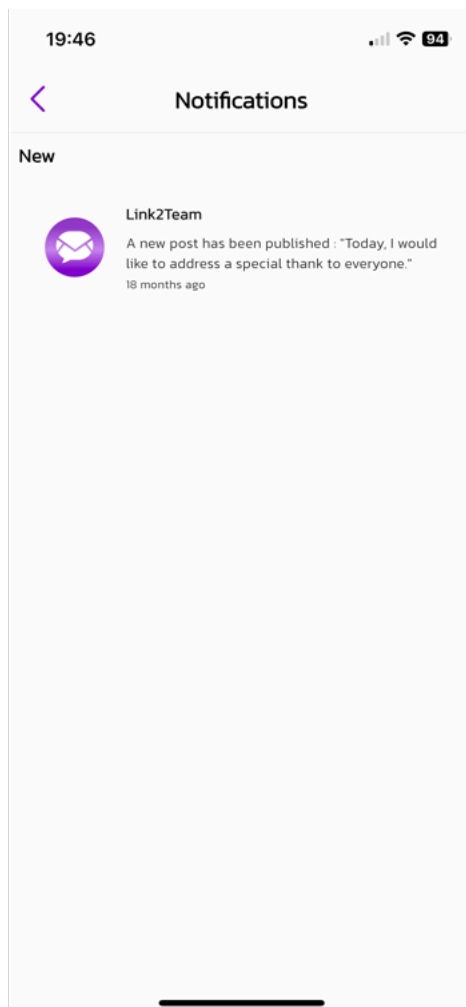

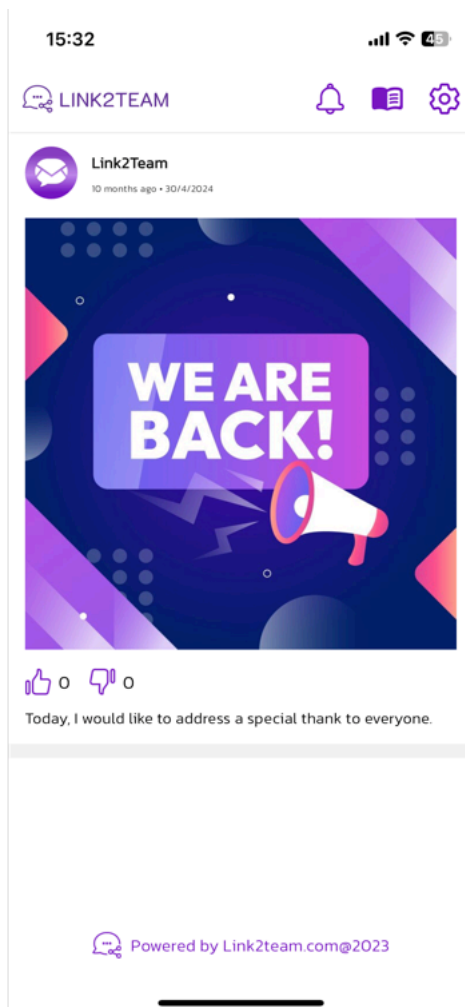

A application designed for internal social communication in corporate, supporting posts, surveys, and comments. Includes an anonymous mode for user privacy.

Responsibilities:

- Developed all mobile APIs, including authentication, post, like/unlike, notification, and more.
- Developed web front-end APIs for the CMS.
- Managed CI/CD pipelines to ensure efficient and reliable deployment workflows.
- Served as the main developer collaborating with the front-end team.

Technologies: [Next.js v13.4.8](#), [headlessui](#), [prisma](#), [tailwindcss](#), [twin.macro](#), [ThaibulkSMS](#), [AWS SNS](#)

Link: [Website](#), [Play Store](#)

JustCar

Aug 2022 - Jul 2023

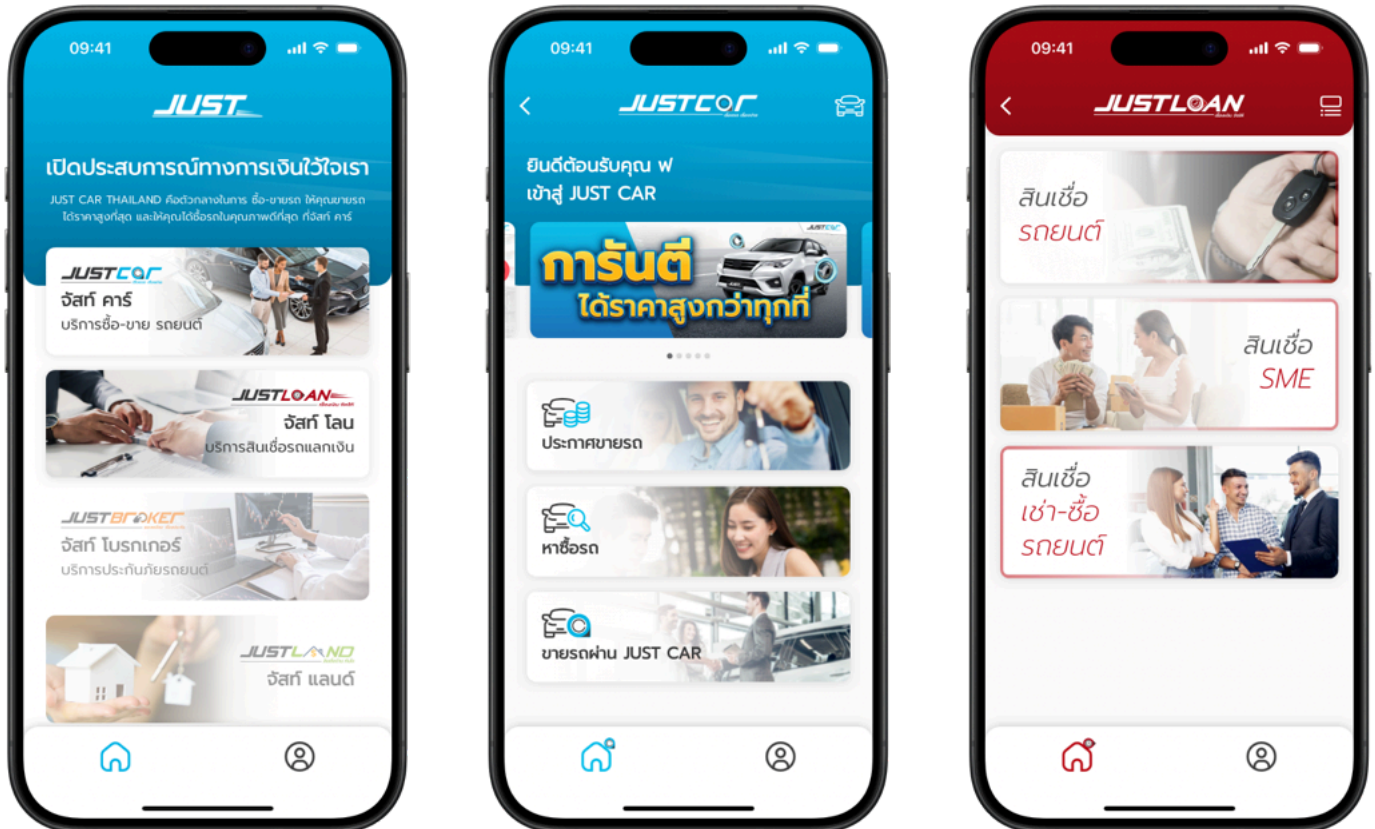

Description:

A platform for buying and selling used cars, offering a wide range of vehicle models and years, Additionally, JustLoan provides loan services to support customers with tailored financial solutions.

Responsibilities:

- Set up a server with CI/CD pipelines using cloud services.
- Developed several feature APIs for a Content Management System (CMS).
- Assisted other teams with small tasks as needed.

Technologies: [Next.js v12.2.5](#), [prisma](#), [next-auth](#), [CASL](#), [tailwindcss](#), [headlessui](#)

Rabbit Rewards (Subscription)

Mar 2022 - Oct 2024

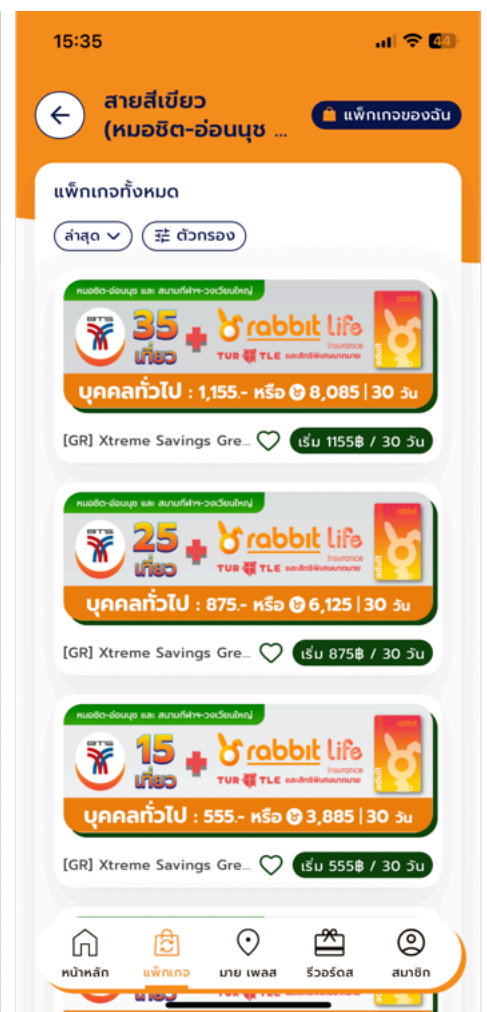

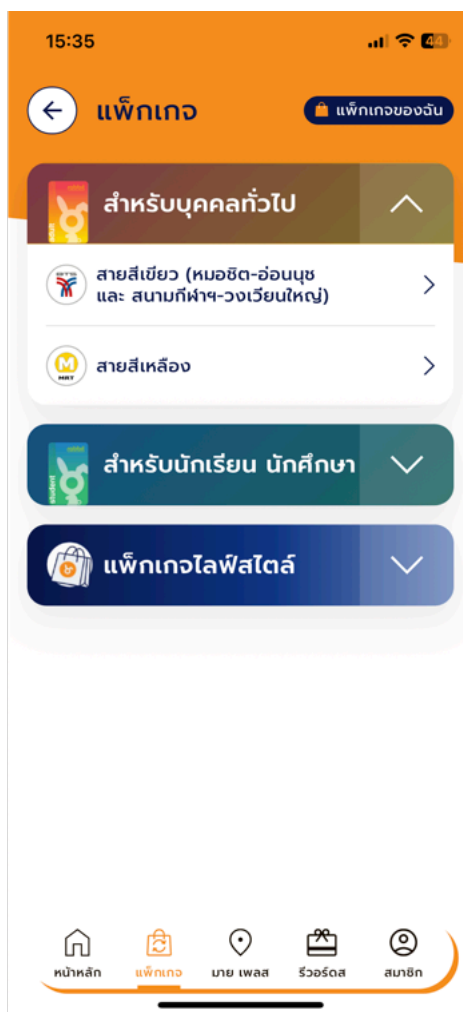

Description:

An API service for a Mobile and CMS applications that handles a subscription model, connecting with multiple payment gateways and internal services.

Responsibilities:

- Initialize a project using Node.js with Express.
- Develop all mobile APIs according to the requirements.
- Develop CMS APIs according to the requirements.
- Implement payment gateways.
- Architect the project for cloud services to handle high usage.
- Optimize project performance.
- Efficiently assigned tasks to quickly implement required changes and add features, meeting project deadlines.

Technologies: [Express](#)

EvRiderz, EvDriverz and EvMerchant

Aug 2020 - Nov 2021

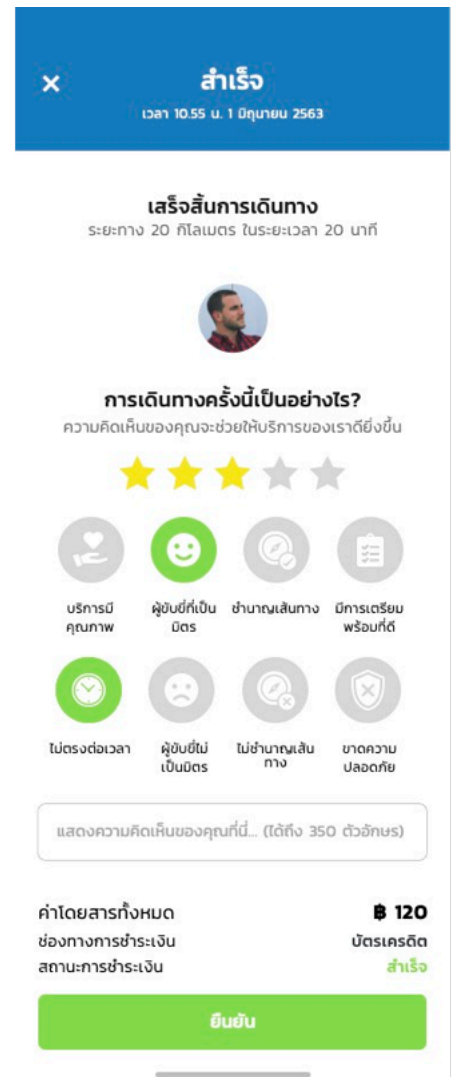

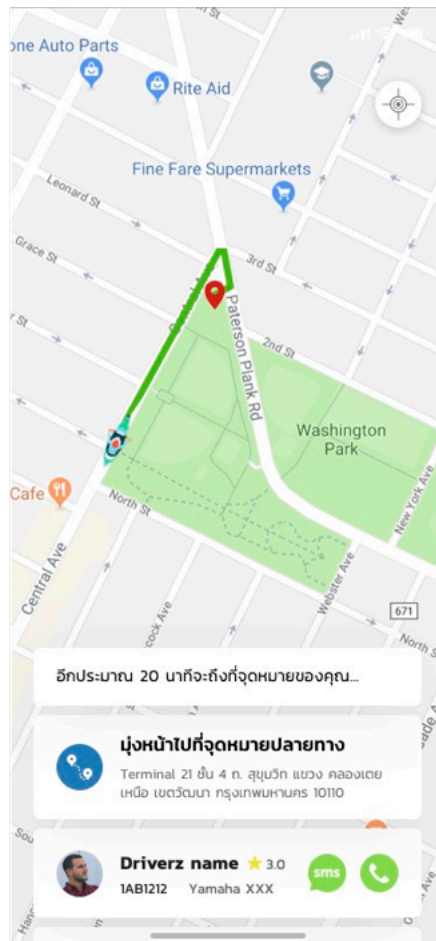

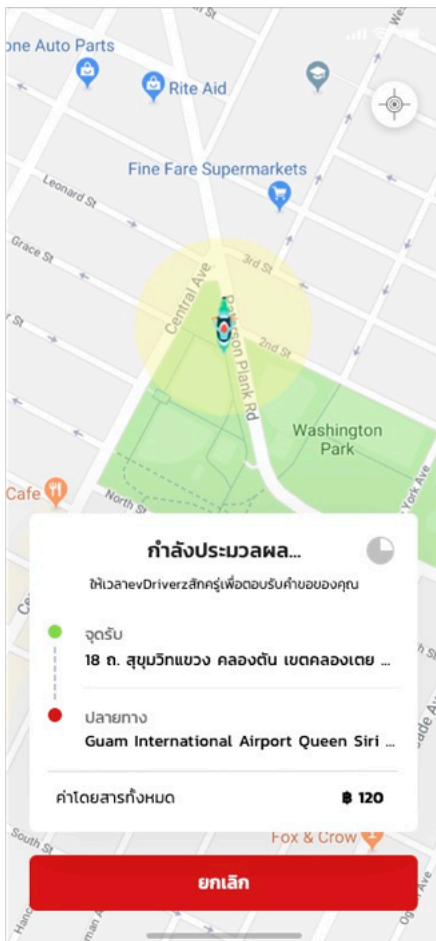

Description:

A ride-hailing application that specializes in electric motorcycle (EV), that includes Rider (End-user), Driver and Merchant app.

Responsibilities:

- Developed core features for the Rider, Driver, and mostly Merchant applications.
- Integrated the 2C2P payment gateway to process payments.
- Established a WebSocket connection.

Technologies: [Android 12](#), [Kotlin v1.6.0](#), [Centrifuge \(Websocket\)](#), [2C2P](#)

Perfumist v3

Mar 2019 - Dec 2022 (v3.3.1 - v4.0.50)

Description:

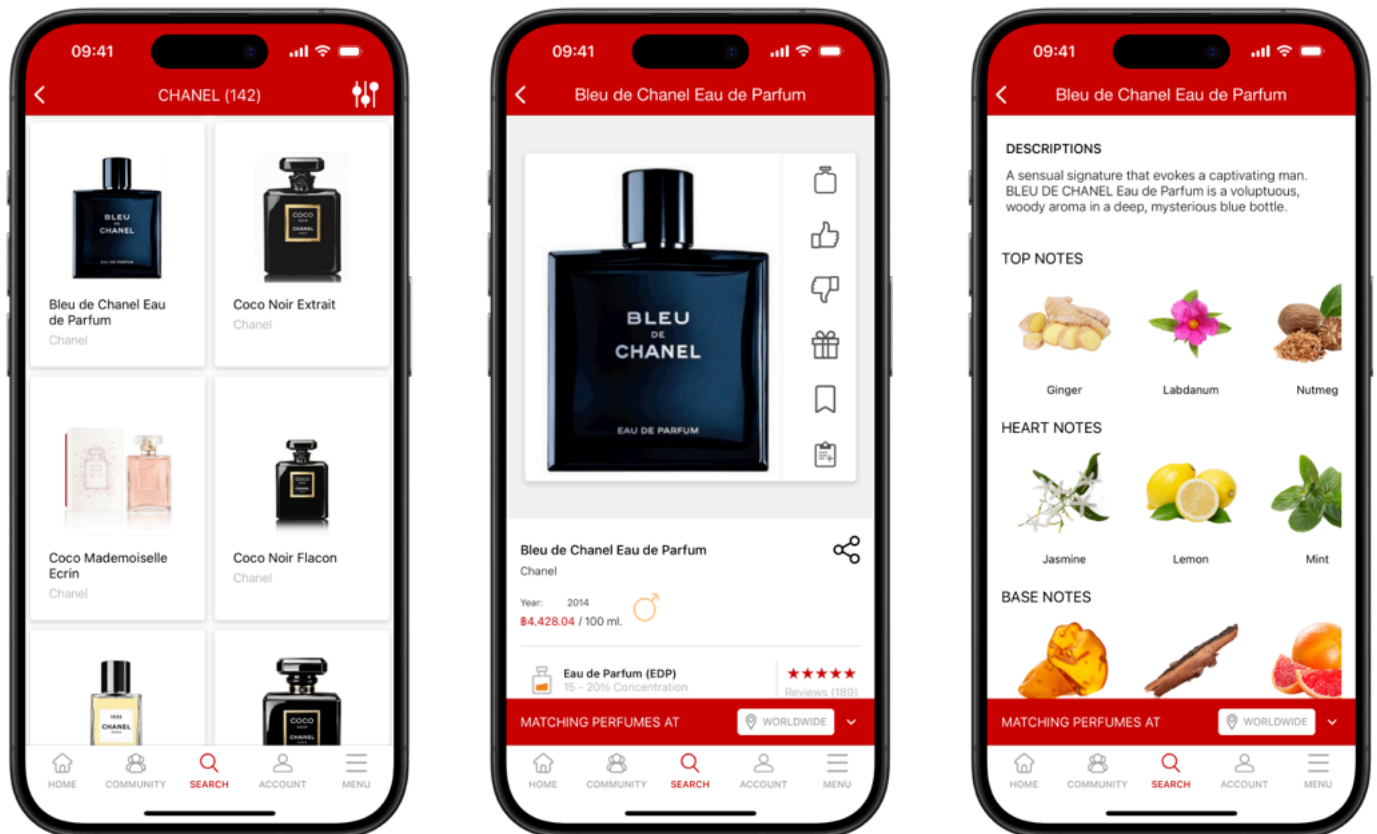

A perfume advisory app that allows users to browse brands, models, fragrance notes, and concentration levels. It also has a Pro version for shop staff.

Responsibilities:

- Built Android apps that improve user experience and functionality with smart design and advanced technology.

Technologies: [Android 13](#), [Kotlin v1.7.20](#)

Link: [Play Store](#), [Youtube \(User\)](#), [Youtube \(Pro\)](#)

Rabbit Rewards (Android)

Aug 2018 - May 2023 (v4.0.0 - v4.4.6)

Description:

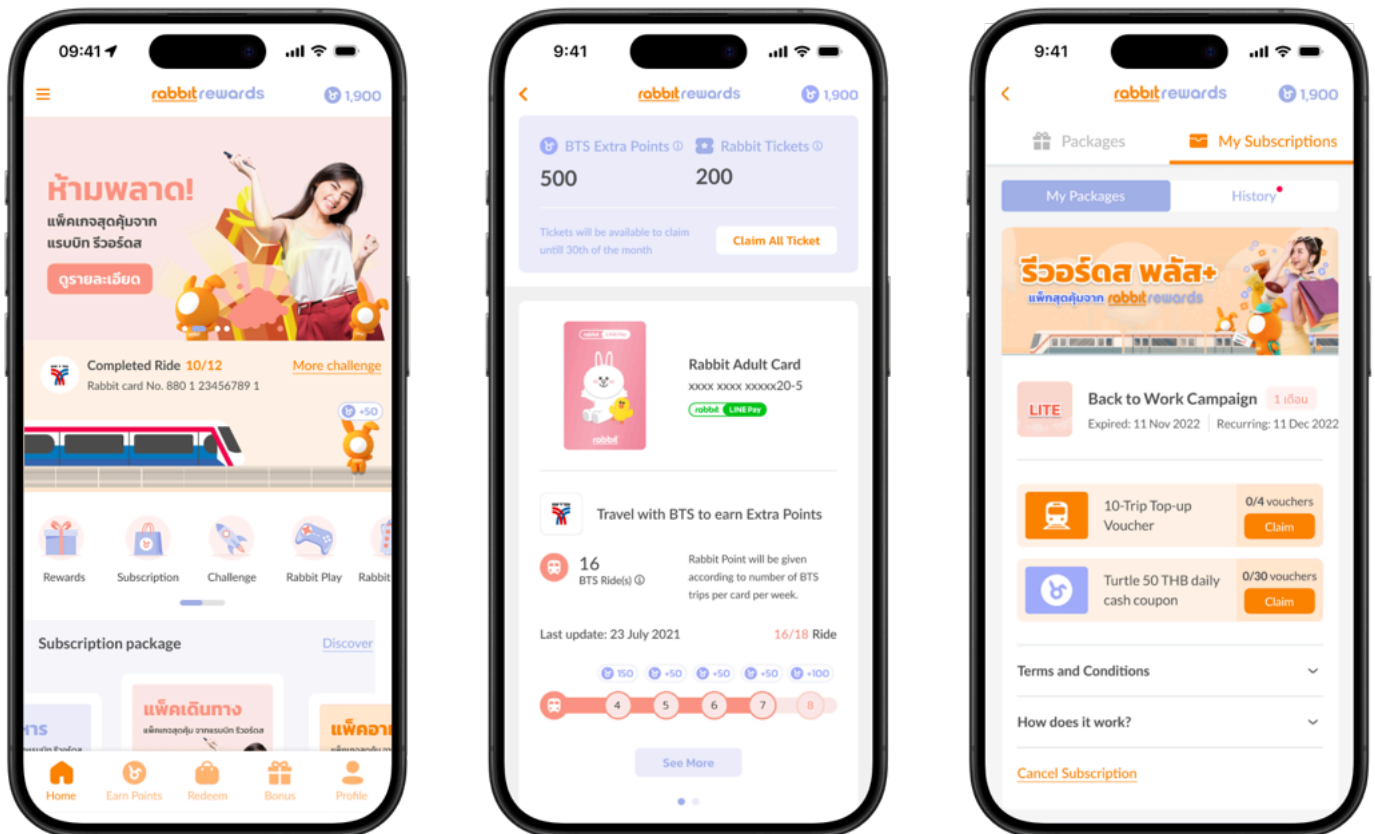

Rabbit Rewards is an application mainly for redeeming points for rewards, featuring surveys, challenges, lucky draws, and more.

Responsibilities:

- Configured project environments.
- Built Android apps, improving functionality and user experience with modern design and tech.
- Efficiently assigned tasks to quickly implement required changes and add features, meeting project deadlines.
- Implement Huawei Mobile Services (HMS) for a hybrid application to be distributed on the Huawei AppGallery.

Technologies: [Android 13](#), [Kotlin v1.7.10](#)

Link: [Play Store](#), [Huawei AppGallery](#), [Youtube](#)

Bemynt

Aug 2017 - Mar 2018

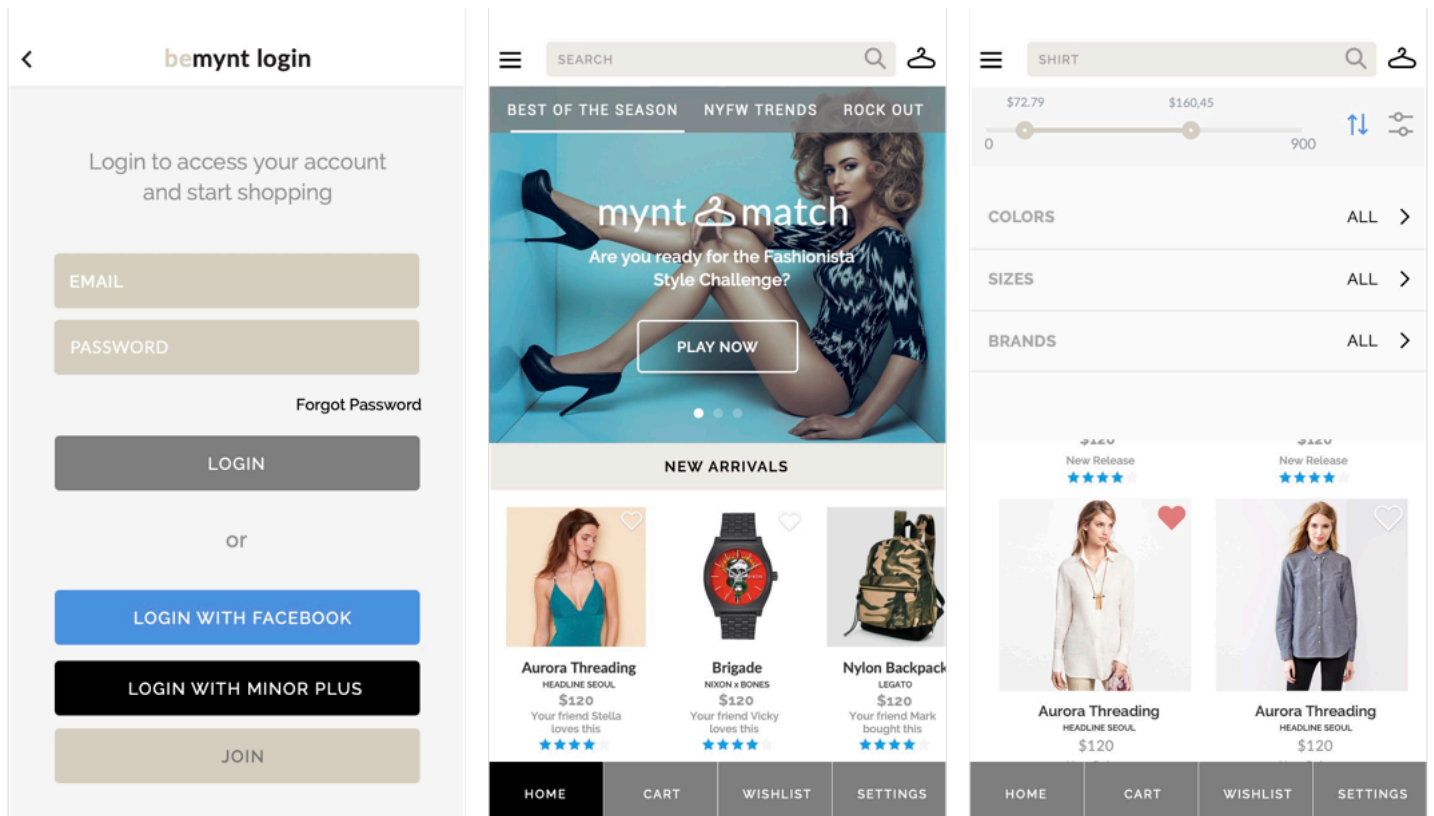

Description:

A fashion marketplace mobile application that can filter by gender, color, size, brand, and other related criteria.

Responsibilities:

- Developed several features.
- Integrated the Omise payment gateway to process checkouts.

Technologies: [Android 7.1](#), [Kotlin v1.2.0](#), [Omise](#)

Canyudo

Mar 2017 - Mar 2018

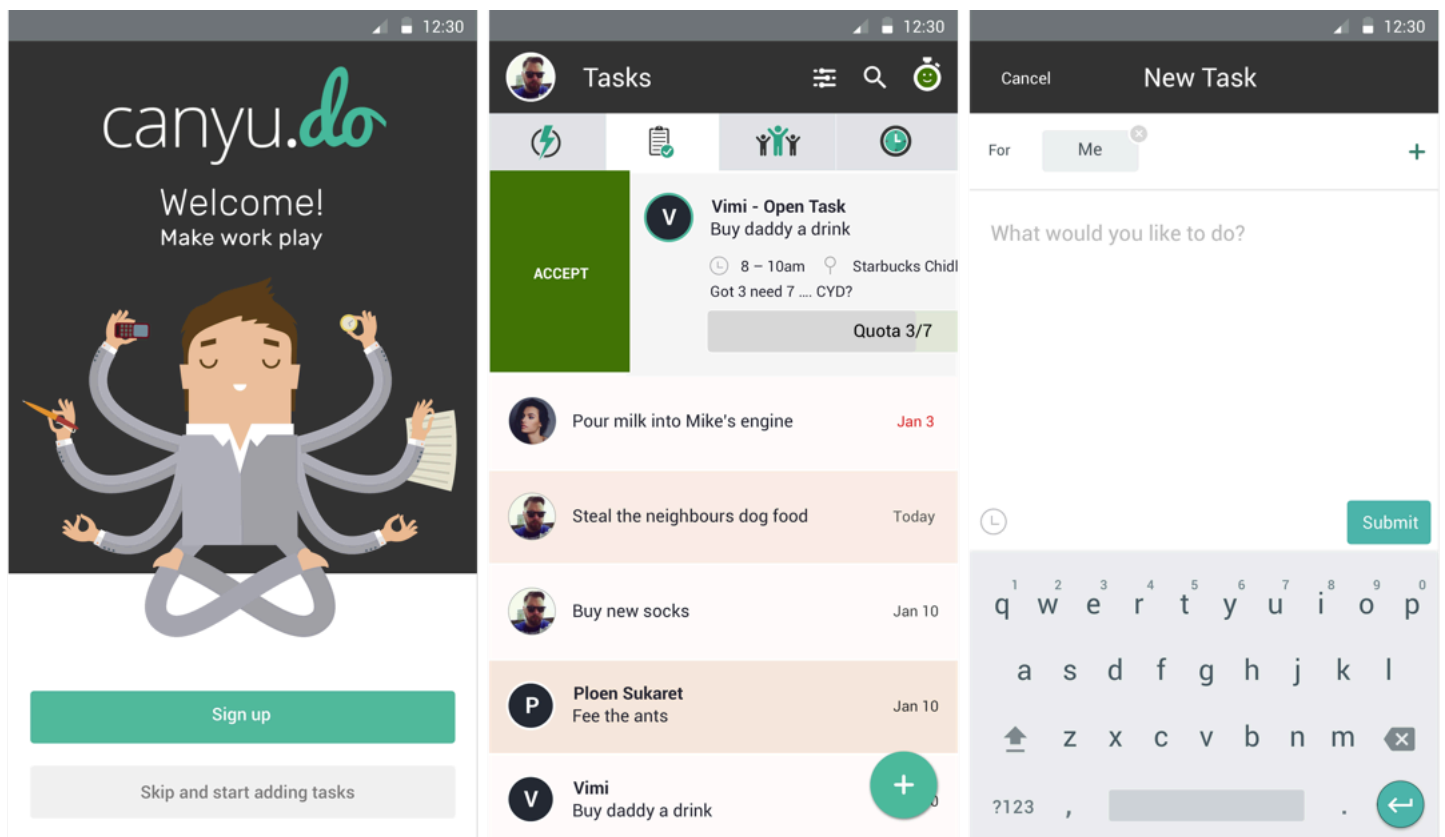

Description:

Canyudo is a mobile application for task management, allowing users to assign tasks, manage group members, set due dates, and handle related activities.

Responsibilities:

- Configured project environments.
- Developed all features, especially user experience in swiping, dragging and dropping, and more.

Technologies: [Android 8.0](#), [Kotlin v1.2.10](#), [Realm](#)

Playbasis DBS

Nov 2016 - Nov 2016

Description:

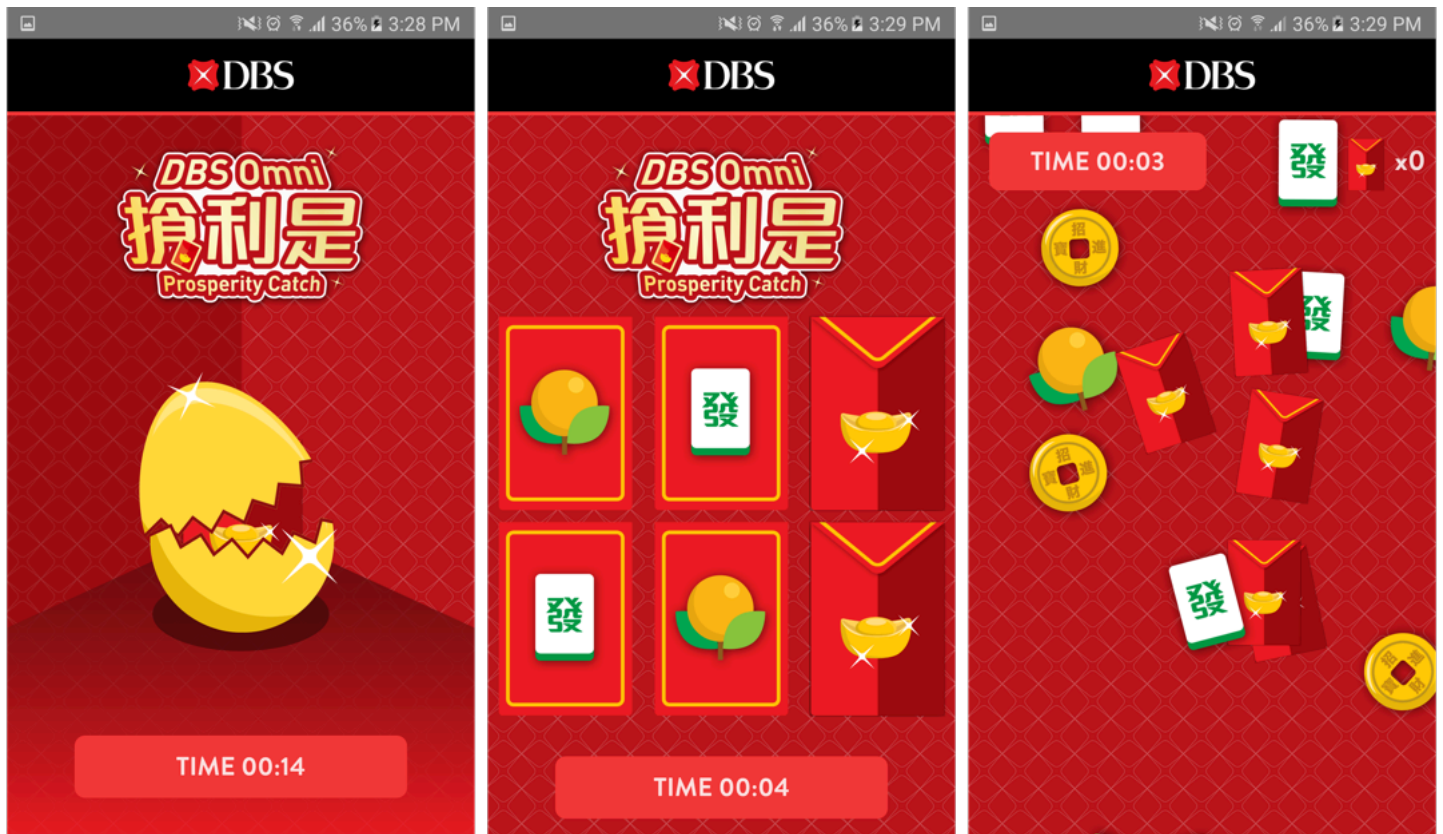

A gamification app that includes three features: shaking eggs, card pairing, and card catching.

Responsibilities:

- Developed a gaming UX/UI focused on motion and logic.

Technologies: [Android 5.0](#)

Link: [Demo](#)

Stroll Guam

Nov 2015 - Jan 2021 (v1.0.0 - v.4.0.5)

Description:

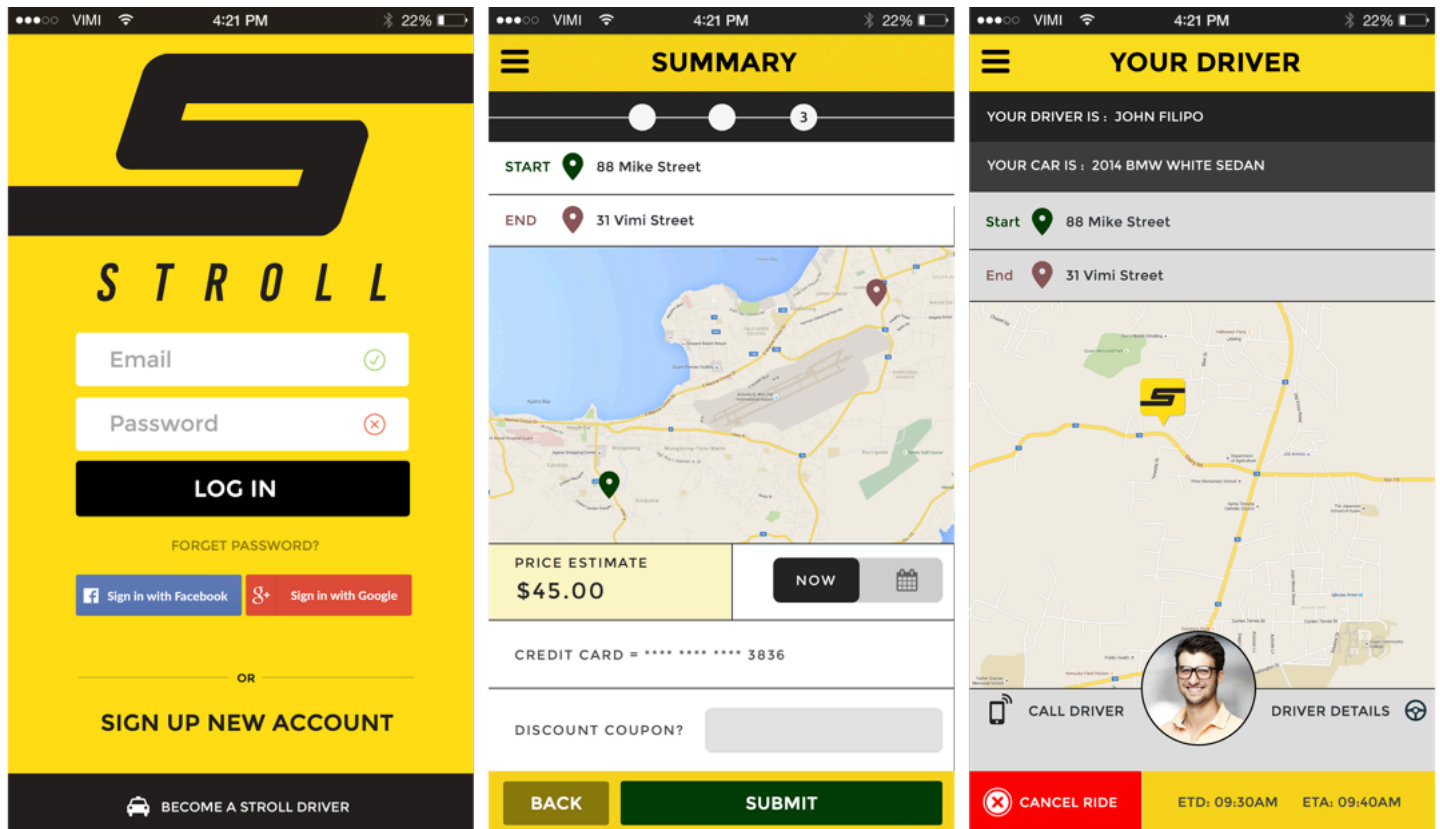

A ride-hailing application available in Guam island.

Responsibilities:

- Developed core features such as streaming locations, socket ride handle and etc.
- Integrated the AuthorizeNet payment gateway to process payment.
- Integrated with a calling service through Twilio.

Technologies: [Android 10](#), [Kotlin v1.4.10](#), [SocketIO](#), [Twilio](#), [AuthorizeNet](#)

Link: [Play Store \(Customer\)](#), [Play Store \(Driver\)](#), [Youtube](#)

Tops

Oct 2015 - Jun 2017 (v1.0.1 - v1.8.16)

Description:

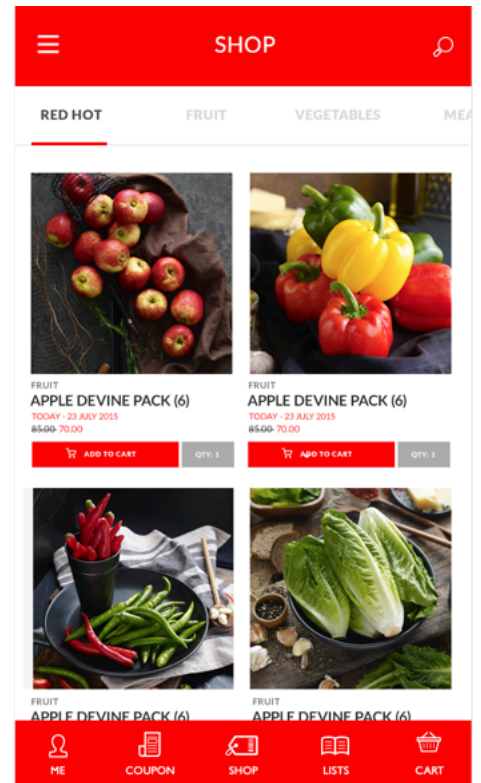

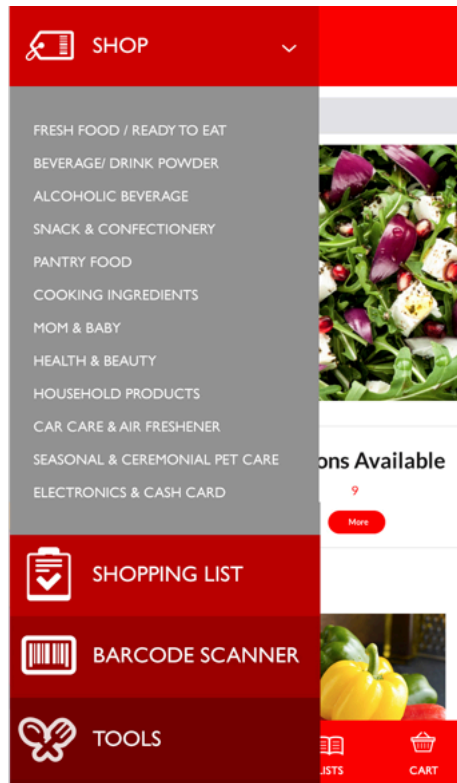

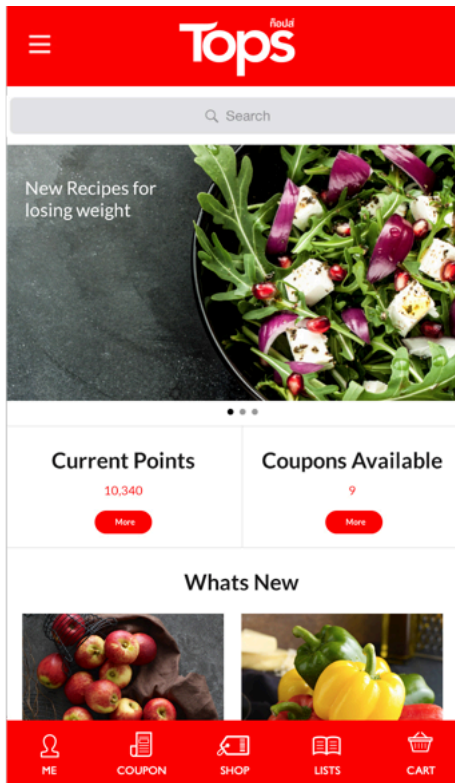

An e-commerce platform for Tops supermarket.

Responsibilities:

- Developed several features such as product listing, product details, and tab menus.
- Integrated the 2C2P payment gateway to process checkouts.

Technologies: [Android 6.0](#), [2C2P](#)

Link: [Youtube](#)

Neibo

Oct 2015 - May 2016 (v2.14.0 - v6.14.0)

Description:

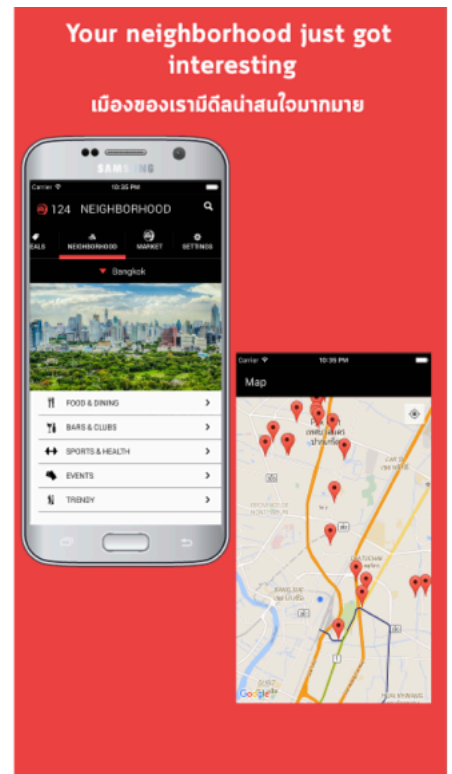

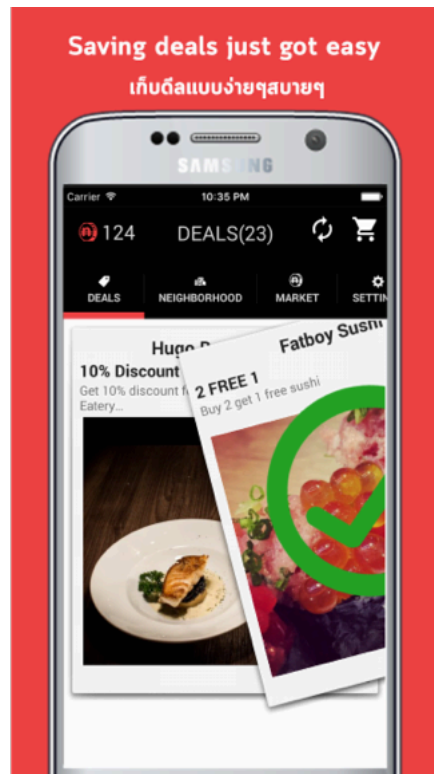

Swipe to find deals in the nearest location-based mobile application.

Responsibilities:

- Assist in fixing bugs and debugging minor features.

Technologies: [Android 6.0](#)

Link: [Youtube](#)

(Internship) KKU Authen

Apr 2014 - May 2014

Description:

A window phone 8.1 application that facilitates automatic login to the Khon Kaen University's internet system.

Responsibilities:

- Learned and developed a Windows Phone 8.1 application using C#.

Technologies: [Window Phone 8.1](#)
